New Continuous Epidural Trays

PAIN MANAGEMENT
Every Epidural Patient Deserves a Safe, Secure Block

The slightest movement can be the difference between a successful block, a compromised block and a failed block. As steady as you may be, a catheter can move, a connector can loosen, or a needle can step off its intended target, and then your efforts to deliver anesthetic, or to send it to the spot where it will have the greatest benefit, are hindered.
With the new Portex® epidural trays, you can reduce the chance of a failed block using devices designed to enhance the procedure by helping to keep medication securely on target and safely away from potential misinjection.

Safe

• Clearly identify medication and help prevent syringes from being mixed up with the pre-printed, water-proof labels included in every kit
• Helps avoid confusing the epidural lines from other routes of access by applying a pre-printed epidural catheter label
• Helps reduce the chance of unintended or accidental needle sticks using Point-Lok® needle protection, a unique needle containment device that locks onto the sharp tip of any anesthesia needle

Secure

• Helps reduce the frequency of epidural catheter disconnects with an EpiFuse™ connector that is easy to activate, color coded and designed to resist disconnection
• Helps minimize catheter migration by securing the catheter with LockIt Plus® catheter securement device over the insertion site
• Helps minimize unintended spinal needle movement during CSE procedures by using CSEcure® needle assemblies to stabilize the spinal needle with the epidural needle

Portex® Trays Help to Promote Epidural Safety
**Safe & Secure Continuous Epidural Trays**

**PRODUCT CODE** | **DESCRIPTION**
---|---
4935MGS-17 | Continuous Epidural Tray with 17G needle, wire reinforced catheter with EpiFuse™ Catheter Connector, Luer slip glass LOR, includes LockIt Plus® Catheter Securement, safety labels and needle protection
4848SC-17 | Continuous Epidural Tray with 17G Tuohy needle, nylon catheter with EpiFuse™ Catheter Connector, Luer lock glass LOR, includes LockIt Plus® catheter securement, safety labels and needle protection
15600S-20 | Continuous Epidural Tray with 18G Tuohy needle, nylon catheter with EpiFuse™ Catheter Connector, Luer lock glass LOR, includes LockIt Plus® catheter securement, safety labels and needle protection
4982S-18/27 | Continuous Spinal Epidural (CSE) tray with 18G Tuohy needle, nylon catheter with EpiFuse™ Catheter Connector, Luer lock glass LOR, includes LockIt Plus® catheter securement, safety labels and needle protection

**LockIt Plus® Catheter Securement**

**PRODUCT CODE** | **DESCRIPTION** | **UNITS PER CASE**
---|---|---
100/399/216 | LockIt Plus® Catheter Securement Device to fit catheters used with 16G and 17G needles | 50
100/399/218 | LockIt Plus® Catheter Securement Device to fit catheters used with 18G needles | 50

**CSEcure® Spinal/Epidural Needle**

**PRODUCT CODE** | **DESCRIPTION** | **SPINAL NEEDLE** | **UNITS PER CASE**
---|---|---|---
4988-17/27 | 17G X 3-1/2" Tuohy | 27G Pencil Point | 10
4989-18/27 | 18G X 3-1/2" Tuohy | 27G Pencil Point | 10

**EpiFuse™ Catheter Connector**

**PRODUCT CODE** | **DESCRIPTION** | **UNITS PER CASE**
---|---|---
4909E | EpiFuse™ epidural catheter connector | 25
